KNK Construction Group RFI

Multipurpose room refresh project

RFI questions for project:

1) There are at some school sites existing motorized screens is it necessary for them to be controlled by a central location? Or if they're existing and have a toggle switch, are they to be left as they currently are and not integrated into the system? **Yes**

2) Would the District want wireless video content input option for projectors. **Yes EUSD is open to this but is not a requirement**

3) Is the District planning to use their existing wired/wireless microphones, we can combine them and balance them using a small mixer then feed into an amplifier? Would this be acceptable? **Yes as long as the solution is universal and easy to operate.**

4) At the Eastside School Site, it would be necessary to build & construct a soffit for Housing new motorized projector screen, as there is no existing space or spot where one can be installed. **This is Permitted**
